

Elavarasan J

Associate Staff Engineer | Agentic AI | React

12+ years building scalable, high-performance frontend systems. Specialized in agentic AI-driven development workflows using TDD approach, improving delivery speed and code quality. Strong emphasis on clean architecture, microfrontend systems, and maintainable code.

Experience

Ongil.ai, Associate Staff Engineer — 01 Sep 2021 to Present

Architected and developed enterprise-scale applications, including an advanced AI chatbot with interactive features and high-performance analytics dashboards. Mentored junior developers on coding standards and best practices.

Gtect Systems, Senior UI Developer — 01 Aug 2016 to 31 Aug 2021

Led end-to-end development of mobile-first websites & custom WordPress themes. Collaborated on wireframes to translate UX concepts into feasible UI architectures.

Asareri Technologies, Web Designer — 14 May 2014 to 29 Jul 2016

Transformed design mockups into pixel-perfect, responsive web interfaces, ensuring cross-device compatibility and enhancing user experience across platforms.

Recent Projects

1. Recurring Transactions | Vanguard(via Capgemini)

- Built a modernized micro-frontend application for managing automatic investment and withdrawal plans, collaborating with backend teams on API requests, responses, and integrations.
- Tech Stack:** StencilJS, TypeScript, Jest, Agentic UI Builder
- Business Impact:** Improved application performance and usability while introducing an AI chatbot to enhance client self-service and reduce support dependency.

2. Agentic UI Builder | Vanguard(via Capgemini)

- Contributed to the development of an agentic UI generation workflow that produces production-ready frontend components using a TDD-driven approach, leveraging multiple structured inputs.
- Tech Stack:** React, Zustand, Shadcnui, AWS Bedrock
- Business Impact:** Reduced component development time from 1-2 days to 1-2 hours

3. Xyden: Leadership Maturity Assessment Platform | Xqtiiv

- Built an end-to-end leadership maturity assessment platform for senior executives, scoring participants across four maturity dimensions using structured trade-off decision-making.
- Tech Stack:** React, TypeScript, Zustand, Agentic UI Pipeline
- Business Impact:** Delivered a 6+ month scoped project in 2 months using an agentic UI generation pipeline.

4. Wealth Advisor Copilot | Capgemini

- Built an AI-powered platform enabling financial advisors to deliver data-driven portfolio recommendations and personalized client insights. Also, Partnering with backend engineers to integrate WebSocket streams and optimize API endpoints
- Tech Stack:** React, Redux Toolkit, WebSocket, Material UI
- Business Impact:** Accelerated client advisory processes by 60%

5. Analytics Dashboard | 3M

- Delivered actionable insights through interactive visualizations by working closely with backend teams to integrate APIs and ensure performance with large datasets, enabling stakeholders to make data-driven decisions.
- Tech Stack:** Figma, React, Redux, D3.js, Highcharts
- Business Impact:** Achieved an 85% improvement in accurate product opportunity identification

Education

B.Tech – Information Technology (2010 - 2014)

Arunai College Of Engineering

HSC (2008 - 2010)

Govt. Boys Higher Secondary School

Technical Skills

Core: JavaScript (ES6+), TypeScript, HTML5/CSS3

Modern Frontend: React, Next.js, Redux, Zustand, Stencil.js (Micro-frontends)

UI & Styling: Tailwind, ShadcnUI, Material UI, Bootstrap, D3.js, Highcharts

Cloud & Deployment: AWS (EC2, S3), Azure (VMs, App Service), Docker, CI/CD, Nginx

Build & Dev Tools: Git, Vite, NPM/ Yarn, Figma, GraphQL, REST, WebSocket

Testing: Jest, Vitest, React Testing Library, Playwright

AI & Emerging Tech: Prompt Engineering, Claude Code, GitHub Copilot, LLM Integration

Core Competencies

Agentic Development
System Architecture
API Design
Accessibility (WCAG 2.1)
Team Mentoring
Code Review
Cross-functional Collaboration

Interests

Technical Content Creation
Developer Community Engagement
