

Elavarasan J

Senior Frontend Engineer | React | Agentic AI

Associate Staff Engineer with 10+ years of experience delivering scalable, high-performance frontend applications. Specialized in agentic AI-driven workflows, AI-powered dashboards and conversational interfaces, with a strong emphasis on clean architecture, performance, and maintainability.

Experience

Ongil.ai, Associate Staff Engineer — 2021 to Present

Architected and developed enterprise-scale applications, including an advanced AI chatbot with interactive features and high-performance analytics dashboards. Mentored junior developers on coding standards and best practices.

Gtect Systems, Senior UI Developer — 2016 to 2021

Led end-to-end development of mobile-first websites & custom WordPress themes. Collaborated on wireframes to translate UX concepts into feasible UI architectures.

Asareri Technologies, Web Designer — 2014 to 2016

Transformed design mockups into pixel-perfect, responsive web interfaces, ensuring cross-device compatibility and enhancing user experience across platforms.

Recent Projects

1. Recurring Transactions | Vanguard(via Capgemini)

- Built a modernized micro-frontend application for managing automatic investment and withdrawal plans, collaborating with backend teams on API requests, responses, and integrations.
- Tech Stack:** StencilJS, TypeScript, Jest, Agentic UI Builder
- Business Impact:** Improved application performance and usability while introducing an AI chatbot to enhance client self-service and reduce support dependency.

2. Agentic UI Builder | Vanguard(via Capgemini)

- Contributed to the development of an agentic UI generation workflow that produces production-ready frontend components using a TDD-driven approach, leveraging multiple structured inputs.
- Tech Stack:** React, Zustand, Shadcnui, AWS Bedrock
- Business Impact:** Reduced component development time from 1-2 days to 1-2 hours

3. Figma to JSON Converter | Vanguard(via Capgemini)

- Developed a design extraction tool that converts Figma designs into structured JSON with full component metadata to enable automated UI generation.
- Tech Stack:** Javascript, Tailwind CSS, HTML, CSS
- Business Impact:** Eliminated manual design interpretation by implementing an automated design-to-code pipeline.

4. Wealth Advisor Copilot | Capgemini

- Built an AI-powered platform for financial advisors, partnering with backend engineers to integrate WebSocket streams and optimize API endpoints for real-time, data-driven portfolio insights.
- Tech Stack:** React, Redux Toolkit, WebSocket, Material UI
- Business Impact:** Accelerated client advisory processes by 60%

5. Analytics Dashboard | 3M

- Delivered actionable insights through interactive visualizations by working closely with backend teams to integrate APIs and ensure performance with large datasets, enabling stakeholders to make data-driven decisions.
- Tech Stack:** Figma, React, Redux, D3.js, Highcharts
- Business Impact:** Achieved an 85% improvement in accurate product opportunity identification

Education

B.Tech – Information Technology (2010 - 2014)

Arunai College Of Engineering

HSC (2008 - 2010)

Govt. Boys Higher Secondary School

Technical Skills

Core: JavaScript (ES6+), HTML5/ CSS3, WordPress, Python

Modern Frontend: TypeScript, React, Angular, Redux, Zustand, Stencil.js, Jest, Websocket

UI Frameworks: Tailwind CSS, Material UI, Bootstrap, D3.js, Highcharts, ShadcnUI

Development Tools: Git, Docker, Vite, CI/CD, Nginx, NPM/Yarn, JIRA, Postman, VS Code, FileZilla

Design Tools: Figma, Photoshop

AI Tools: Claude Code, GitHub Copilot, AWS Bedrock

Core Competencies

Agentic Development
System Architecture
Team Mentoring
Code Review
Agile Development
Cross-functional Collaboration

Interests

Technical Content Creation
Developer Community Engagement
